**What were the main issues to come out of the meeting/event from the LINK perspective?** (*List between 1 and 6 bullet points would be helpful*).

- Services, which contribute towards health improvement within their area
- Matters, which have been agreed by the Staffordshire Health Scrutiny Committee and the relevant District/Borough
- Local National Health Service Bodies
- District/Borough services that interface with planning for and provision of health services. For examples, but not exclusively, housing, leisure and environmental health service
- Voluntary sector services where they are provided from or within the District/Borough area
- Local partnerships, e.g. health improvement partnerships

**Action Points/How can the LINK help?** (Bullet points re: what, if any, requests for LINK help were received and from who plus who needs to follow up?)

*This was a very productive meeting with a group of people who are looking to keep up with the changes and the service given by the Local NHS. During the meeting we discussed the need to get more individuals involved in their own health care. It was agreed to look into running a local NULBC road show to engage more people. They are prepared to be involved with LINK and are willing to assist us in our need to get more people involved. Bardwell Hospital and the demise in services at this location were discussed in detail also an update on the move into new facilities for the University Hospital and the group were assured that there would be no stopping of services during this impotent period of change.*

*A number of other subjects were covered including work being carried out by the group concerning dementia and stroke they were extremely interested in what the LINK were doing in this area and requested if an update could be given at the next meeting*
